

README - Strategy Walkthrough

Strategy Walkthroughs Index This folder contains plain-text walkthroughs, generated PDF explainers, and baseline CSV files used to create strategy visualizations. Main documents - basic_keltner_reversion.txt : Step-by-step explanation for Basic KC Reversion. - bmsb.txt : Step-by-step explanation for BMSB strategy. - donchian_breakout.txt : Step-by-step explanation for Donchian Breakout. - ema_cross.txt : Step-by-step explanation for EMA Cross strategy. - ema_trend_hold.txt : Step-by-step explanation for EMA Trend Hold strategy. - emalyarovich_smas.txt : Step-by-step explanation for E. Malyarovich SMAS strategy. - k_davey_mom_keltner.txt : Step-by-step explanation for K. Davey Momentum+Keltner. - rsi_reversion.txt : Step-by-step explanation for RSI Reversion. - strategy_comparison.txt : Cross-strategy comparison and ranking. Generated PDF explainers - pdfs/basic_keltner_reversion.pdf - pdfs/bmsb.pdf - pdfs/donchian_breakout.pdf - pdfs/ema_cross.pdf - pdfs/ema_trend_hold.pdf - pdfs/emalyarovich_smas.pdf - pdfs/k_davey_mom_keltner.pdf - pdfs/rsi_reversion.pdf - pdfs/strategy_comparison.pdf Generated CSV files - csv_baselines/basic_keltner_reversion.csv - csv_baselines/bmsb.csv - csv_baselines/ema_cross.csv - csv_baselines/ema_trend_hold.csv - csv_baselines/emalyarovich_smas.csv - csv_baselines/k_davey_mom_keltner.csv - csv_baselines/rsi_reversion.csv Generated comparison artifacts - metrics/strategy_comparison.json - metrics/strategy_comparison_report.txt Notes - Baseline datasets are created from deterministic synthetic OHLCV data. - Some strategies may produce empty baselines for the baseline dataset (for example, Donchian in current defaults), so no CSV may exist for that strategy. Regeneration commands 1) Run self-tests: PYTHONPATH=. python3 scripts/test_strategies_selftest.py 2) Regenerate PDFs and baseline CSVs: PYTHONPATH=. python3 scripts/generate_strategy_pdfs.py This command also regenerates the unified deterministic metrics JSON and the human-readable comparison report under metrics/.

README - Data note

No trade CSV was produced for this strategy on the synthetic baseline dataset. This usually means the synthetic baseline dataset did not trigger entries under default parameters.
